

LE MINH QUANG

SOFTWARE ENGINEER

0387412607 | lmquang.devops@gmail.com | minwang.dev | Vinhomes Grand Park Ho Chi Minh City

SUMMARY

Software Engineer with enterprise experience at FPT IS and hands-on full-stack, mobile, and cloud delivery using C# (.NET 8), TypeScript, React, Flutter, and Alibaba Cloud. Strong in RESTful APIs, application maintenance, deployment, and AI-assisted development workflows.

EXPERIENCE

Software Developer

12/2025 - Present

FPT IS

Lightbase Mini App Management CMS

- Developed a modular TypeScript management system for the lifecycle of 4 Mini Apps and a React Native (Expo) Super App shell.
- Built backend distribution workflows, RBAC, and used AI Agents/MCP for coding, debugging, and automation.

Vietnam National Electronic Procurement System (VNEPS)

- Developed responsive frontend modules and reusable UI components from enterprise design specifications.

eTrip - Maintenance & Migration Support

- Maintained eTrip during migration from FIS Insight to myFPT Next; fixed check-in failures and missing UI icons introduced after migration.

Freelance Full-stack / Mobile & Cloud Developer

06/2026 - Present

TRIEU HY MEDIA COMPANY LIMITED

- Designed in Figma and developed Zhaoxi, a web-based ordering/service platform with customer flows and a partner portal for store configuration and management.
- Supported deployment and release operations for CocoDrama, including mobile publishing, production setup, and release troubleshooting.
- Configured Alibaba Cloud services including OSS, VOD, CDN, RAM permissions, DNS/domain verification, and SSL certificates.
- Collaborated directly with a China-based technical team on app requirements, API integrations, cloud infrastructure, bug resolution, and release coordination.

Full-stack Developer Intern

07/2025 - 10/2025

Hynnie - TMTECH Lighting

- Supported an internal ERP and implemented CRUD, authentication/authorization, REST integrations, form validation, and defect fixes using React, ASP.NET Core (.NET 8), C#, and SQL Server.

PROJECTS

GameNect - AI-Powered Social Network

09/2025 - 04/2026

Lead Developer

- Built a Flutter social platform for 1,000+ users with realtime chat/media/calls and a Gradient Boosting matchmaking model (ROC-AUC 0.87).
- Deployed the FastAPI recommendation service with automated retraining and delivery via GitHub Actions.

AutoFarm - AI-Powered Social

04/2026 - 08/2026

AI Automation / Full-stack Engineer

- Built a Next.js/Node.js automation SaaS with Puppeteer, Supabase, GitHub Actions, and Gemini LLM structured-output workflows.
- Designed 13 workflows for up to 20 accounts with realtime logs, quotas, concurrency control, retries, and failure isolation.

EDUCATION

Ho Chi Minh City University of Technology

Information Technology

2022 - 2026

GPA: 3.43 / 4.0

SKILLS

Languages

C# · TypeScript · JavaScript · Dart · Python · SQL

Development

React · Next.js · React Native · Flutter

ASP.NET Core (.NET 8) · RESTful APIs

Database & DevOps

Microsoft SQL Server ·

PostgreSQL

Firebase · Git · Docker · CI/CD

Alibaba Cloud · DNS · SSL

AI & Automation

LLM Applications · AI Agents · MCP · RAG

Prompt Engineering · Tool Calling · AI API Integration

Software Engineering

OOP · SOLID · Design Patterns · Database Design

CERTIFICATIONS

English for IT 2 - Cisco

JavaScript Essentials 2 - Cisco

RESEARCH

Frameworks & Tech: SvelteKit, Encore, Flask, Scikit-learn (Gradient Boosting)

Focus: AI Matchmaking Logic, Super App Architecture, Hybrid WebView Optimization
